Yeadon® GOLF STRUCTURES

**Minimum Investment
Maximum returns...**

Yeadon® is North America's industry leader in high quality Air-Supported Structures for GOLF, for virtually any climate condition.

Features of Yeadon structures include -Yeadon's Aluminum Base Attachment Channel (cast into the concrete beam) for a fast and easy put-up and take-downs, high profile sidewalls for maximum headroom, high gloss 14oz inner liner, highest quality doors, state-of-the-art reflective lighting systems, combination ALL-IN-ONE high efficiency mechanical heating/inflation/standby system with the industry leading computerized controls for maximum energy efficiency and ease of maintenance.

Over 30 years experience constructing quality Air Supported Structures for sports, industry and construction, has earned Yeadon® its reputation as the industry leader. Their state of the art, energy efficient structures incorporate the latest innovations in design, anchoring, mechanical, electrical and proprietary control systems.

Yeadon® also offers their **R-Plus** insulated permanent structures for maximum energy efficiency.

Standards:

Yeadon® structures meet and exceed industry standards including Air Structures Design and Standards Manual ASI, ASCE, CSA CAN-S109, NFPA 701, UBC, BOCA.

Technical Support:

Design, construction advice, specifications, preparation of tenders and bids, and a **24 hour HOT-LINE** service are all part of Yeadon's services.

YEADON® WARRANTY

Materials and workmanship employed in Yeadon® fabric structures have a warranty period of three (3) years against defects in workmanship and materials. Fabric warranties are 10 year, pro-rated for maximum protection. Mechanical heating and electrical equipment warranties are 1 year for parts.

Yeadon's heating equipment is supplied with Yeadon® start-up or commissioning and is covered for the first 90 days for all parts and labor.

Specifications:

- **CLEAR SPANS** - up to 360' (110m) wide, by any length
- **OUTER FABRIC** - 28 oz or 32 oz/sq yd high quality Shelter-Rite® high tensile, flame resistant, PVC coated polyester fabrics (translucent or opaque), with 10 year pro-rated warranty
- **FINISHES** - standard acrylic or Dupont Tedlar® protective coatings available
- **INNER THERMAL-ACOUSTIC LINER** - 14 oz/sq yd. high strength PVC coated polyester fabric with Yeadon® high gloss finish, in white, blue, or green (custom colors also available).
- **MECHANICAL SYSTEMS** -
 - a) Furnace/Inflation/Standby - Yeadon® features their ALL-IN-ONE combination mechanical unit - custom designed, quiet, supplied with stainless steel heat exchangers, ETL and CGA approved, complete with remote station controls to operate and maintain the structure, may be designed for underground ducts or direct discharge.
 - b) Yeadon® Standby Units - incorporate separate secondary fan systems for low pressure, with a separate engine - driven fan for power failure emergencies.
 - c) Air Cooling Units - designed for specific site conditions are available as an option.
 - d) Controls - Yeadon offers the most advanced automatic controls available, - the **Yeadon Wind Sensor Control** - using state of the art computerized controls for interior pressure, heating, and monitoring.
- **INSULATION** - Yeadon® offers its **R-PLUS** insulated structures for permanent installations. R-Plus structures are available from R-12.
- **BASE CHANNEL** - Yeadon® exclusive extruded and anodized aluminum channel is cast into concrete grade beams which ensures a virtually airtight low cost attachment of the structure to the concrete.
- **DOORS** - heavy duty high quality pre-assembled exit, revolving and pedestrian air lock door units, complete with exit lighting and hardware.
- **AIR LOCKS** - heavy duty, fabric covered steel framed vehicle airlocks for trucks etc. Supplied with electrically operated steel roll-up doors.
- **LIGHTING** - Yeadon high intensity metal halide indirect lighting systems, utilizes the most efficient optical reflectors, to provide maximum lighting uniformly on the playing surface. The fully faceted, heavy duty, impact resistant, glass finished optical assembly, provides energy efficiency characteristics for maximum levels of illumination and minimum maintenance.
