

Soccer Air Structures

*Fulham Football Club (English Premiership) - Exterior
United Kingdom*

(in a variety of colours), highest quality doors, modern reflective lighting systems with industry leading computerized controls for maximum energy efficiency and ease of maintenance.

Yeadon®'s customer list of soccer dome users include many world-class clubs including the English Premier league's Fulham Soccer Club. Other customers include Calgary West Soccer, Irish Sports, U.S. Soccer and Catalogna. Our soccer structures can be found worldwide and Yeadon® is proud to say we have built the world's largest air-supported indoor soccer structure in Laval, Quebec.

Standards

Yeadon® structures meet and exceed industry standards including Air Structures Design and Standards Manual ASI, ASCE, CSA, CAN-S109, NFPA 107, UBC, BOCA.

Technical Support

Design, construction device, specifications, preparation of tenders and bids, and a staffed 24 hour hot-line service are all part of Yeadon®'s services.

Specifications

- **Clear Spans** – up to 360' (110 m) wide by any length.
- **Outer Fabric** – 28oz or 32oz per square yard, high quality, high tensile, flame resistant, PVC coated, polyester fabrics are available as translucent or opaque with a 10-year pro-rated fabric warranty.
- **Finishes** – standard acrylic or Dupont Tedlar® protective coatings are available. Tedlar® coated fabrics have a 15-year pro-rated fabric warranty.

*Hornet's Nest Dome -- Interior
Gloucester, ON*

Yeadon® is the industry leader in air-supported indoor soccer structures and has numerous structures worldwide that allow year round soccer play.

Over 25 years experience constructing quality air-supported structures for sports, industry and construction has earned Yeadon® its reputation as the industry leader. Our state-of-the-art energy efficient structures incorporate the latest innovations in design, anchoring, mechanical, electrical and proprietary systems.

Features of Yeadon® structures are: Aluminum Base Attachment Channel that is cast into the concrete beam for quick and easy put-ups and take-downs, high profile sidewalls for maximum headroom and light room, high gloss 14oz inner liner

YEADON®

Embracing Innovation

YEADON®

Embracing Innovation

*Thunderbird Dome – Interior
Ottawa, ON*

- **Standby Unit** – incorporates separate secondary fan systems for low pressure, with a separate independent engine-driven fan for power failures.
- **Air Cooling Units** – designed for specific site conditions are available as an option.
- **Controls** – The Wind Sensor Control is the most advanced automatic controls available. It uses modern computerized controls for interior pressure, heating, and monitoring.
- **Insulation** – Yeadon® offers its R-Plus insulated structures for permanent installations. R-Plus structures are available up to R-12.
- **Base Channel** – Our exclusive extruded and anodized aluminum channel ensures a virtually airtight, low cost attachment when cast into the concrete grade beam
- **Doors** – Heavy-duty, high quality, and pre-assembled exit doors, revolving doors, car and pedestrian air lock door units are available. They all come complete with exit lighting and hardware.
- **Air Locks** – Heavy duty, fabric covered steel frame vehicle air locks for trucks, etc. Supplied with electrically operated steel roll-up doors.
- **Lighting** – Yeadon®'s high intensity metal halide indirect lighting systems utilize the most efficient optical reflectors to provide maximum lighting uniformly on the playing surface. The fully faceted, heavy duty, impact resistant, glass finished, optical assemblies provide energy efficiency with maximum levels of illumination and minimum maintenance.

*City of Woodbury -- Interior
Woodbury, MN*

*City of Woodbury – Exterior
Woodbury, MN*

- **Inner Thermal-Acoustic Liner** – 16oz per square yard, high strength, PVC coated, polyester fabric with Yeadon® high gloss finish in white, blue, green, or any other color that you may desire.
- **Mechanical Systems** –
 - **Furnace/Inflation/Standby** – Yeadon® features an all-in-one combination mechanical unit which is custom designed, quiet, and supplied with stainless steel heat exchangers (ETL and CGA approved.) This unit comes complete with remote station controls to operate and to maintain the structure, and can be designed for underground ducts or direct discharge.
